PROFILE SUMMARY

Frontend Developer with expertise in HTML, CSS, JavaScript, and Bootstrap, React skilled in creating responsive and user-friendly web interfaces. Experienced in translating UI/UX designs into functional applications while ensuring performance, accessibility, and cross-browser compatibility. Passionate about delivering seamless digital experiences.

PROJECTS

1. Furniture E-commerce Website

- Built a static furniture website using HTML & CSS.
- Focused on responsive layouts and modern UI design.
- Highlighted color schemes, typography, and page structure.
- Simple, lightweight site with no backend features.

2. Partake – Food Ordering E-commerce

- Developed an interactive food ordering website using HTML, CSS & Bootstrap.
- Created responsive layouts for multiple devices.
- Designed homepage, menu, and order flow pages.
- Enhanced user experience with interactive UI components.

3. Full-Stack E-commerce Platform

- Built a dynamic e-commerce frontend using HTML, CSS, JavaScript, React & Redux.
- Implemented reusable components and state management.
- Added features like product filtering and a shopping cart system.
- Showcased skills in scalable front-end architecture.
